

AFTER A NATURAL DISASTER

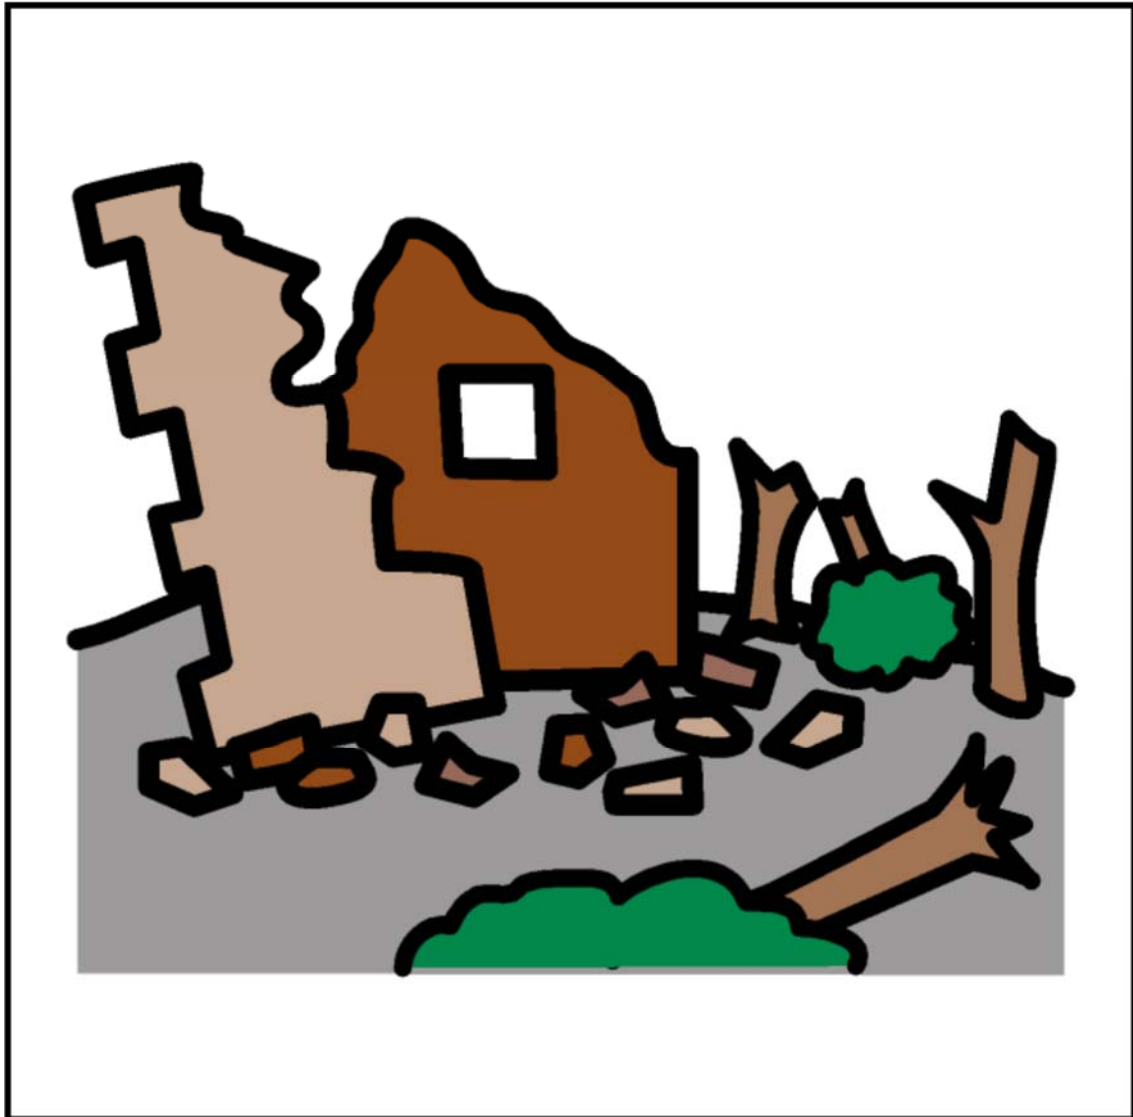

We live in Queensland.

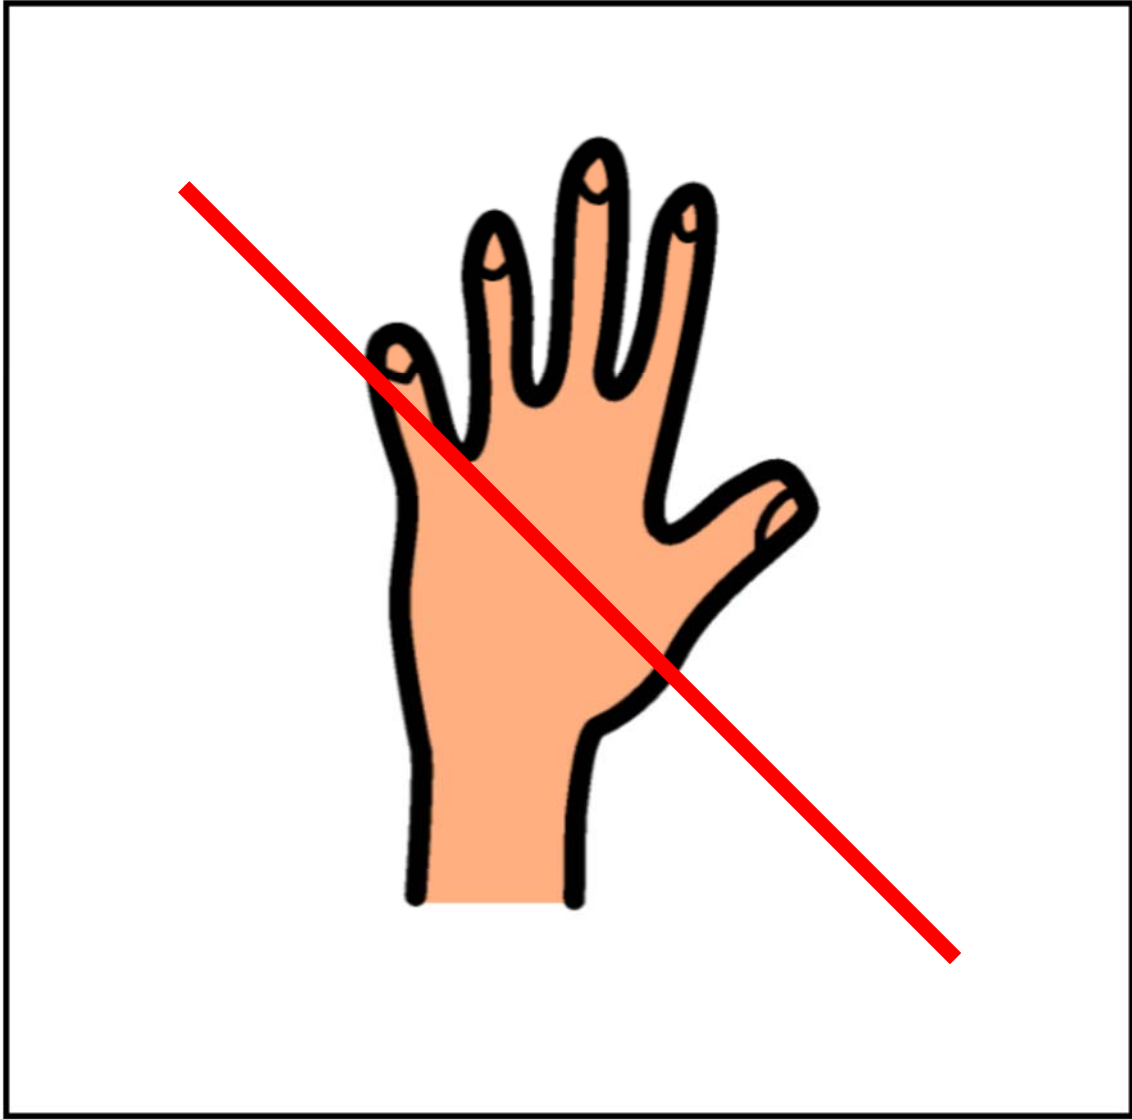

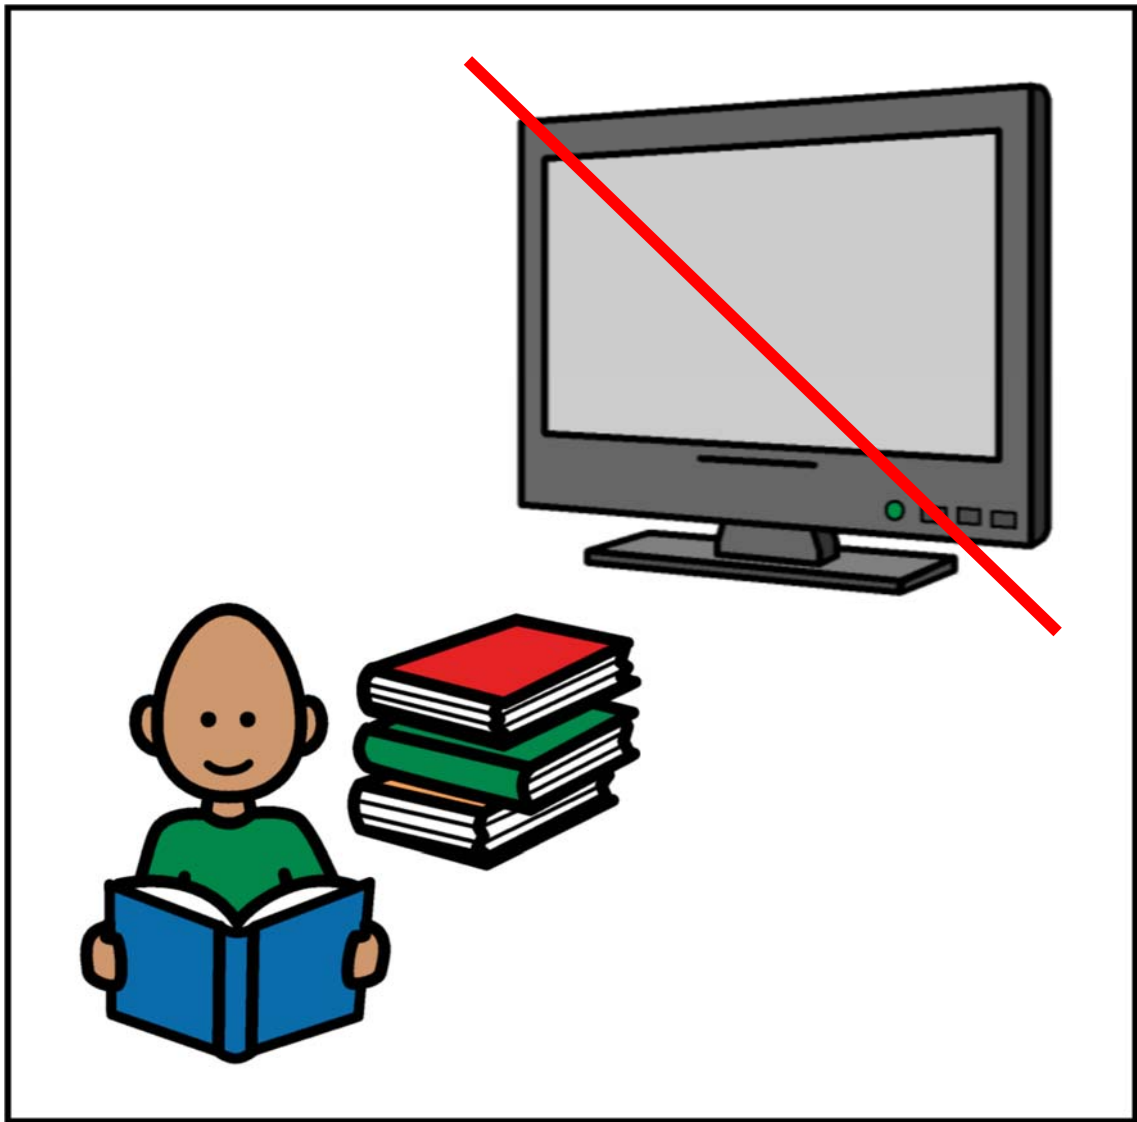

Sometimes there are natural disasters in Queensland like cyclones or floods.

After a natural disaster there can be a lot of mess. Sometimes roads, houses and other buildings such as schools can be damaged.

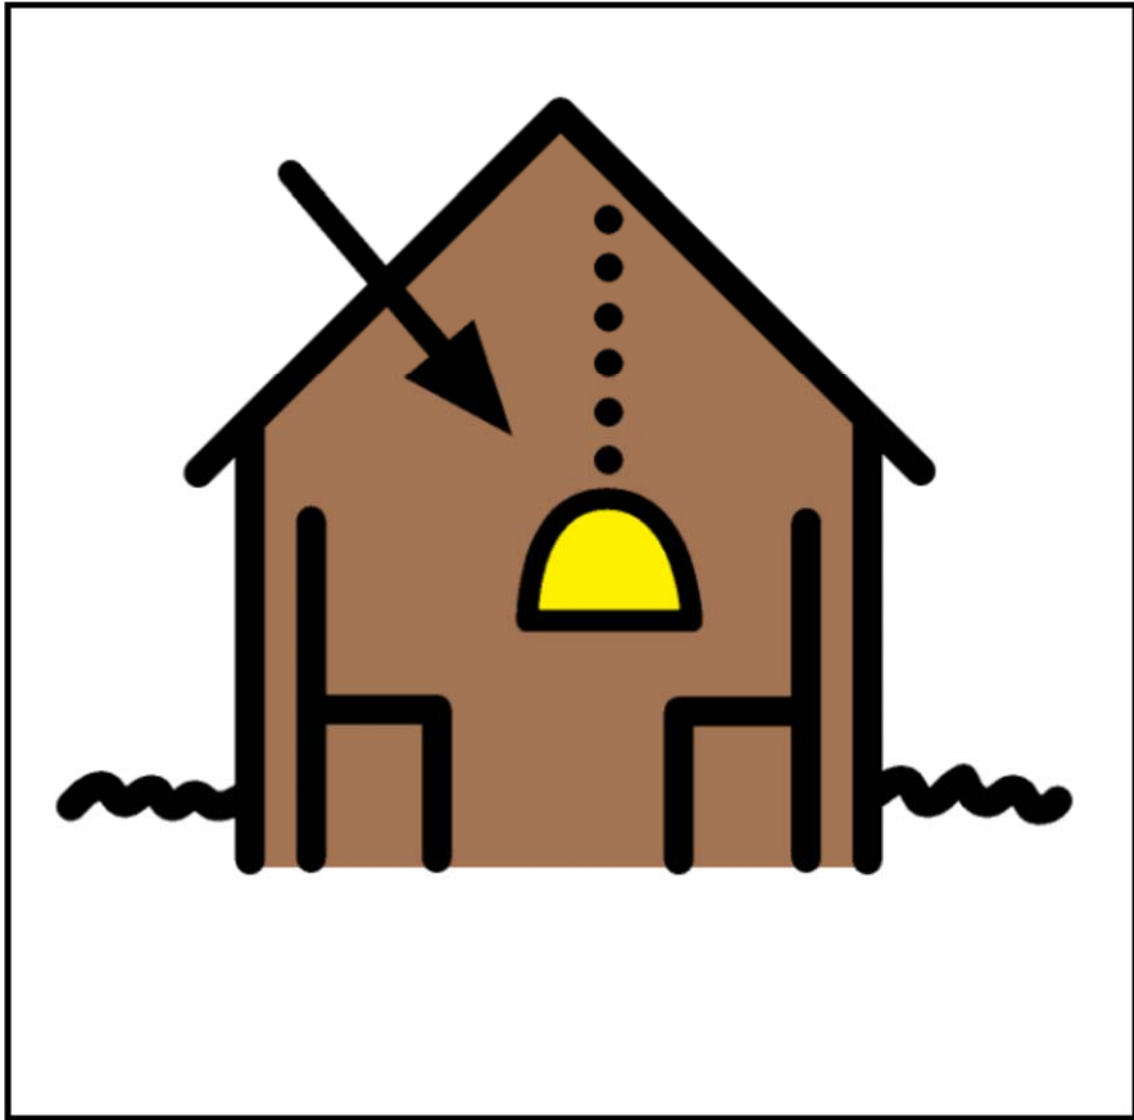

Trees and power lines can fall over. Power lines are very dangerous. It is very important that we do not touch power lines.

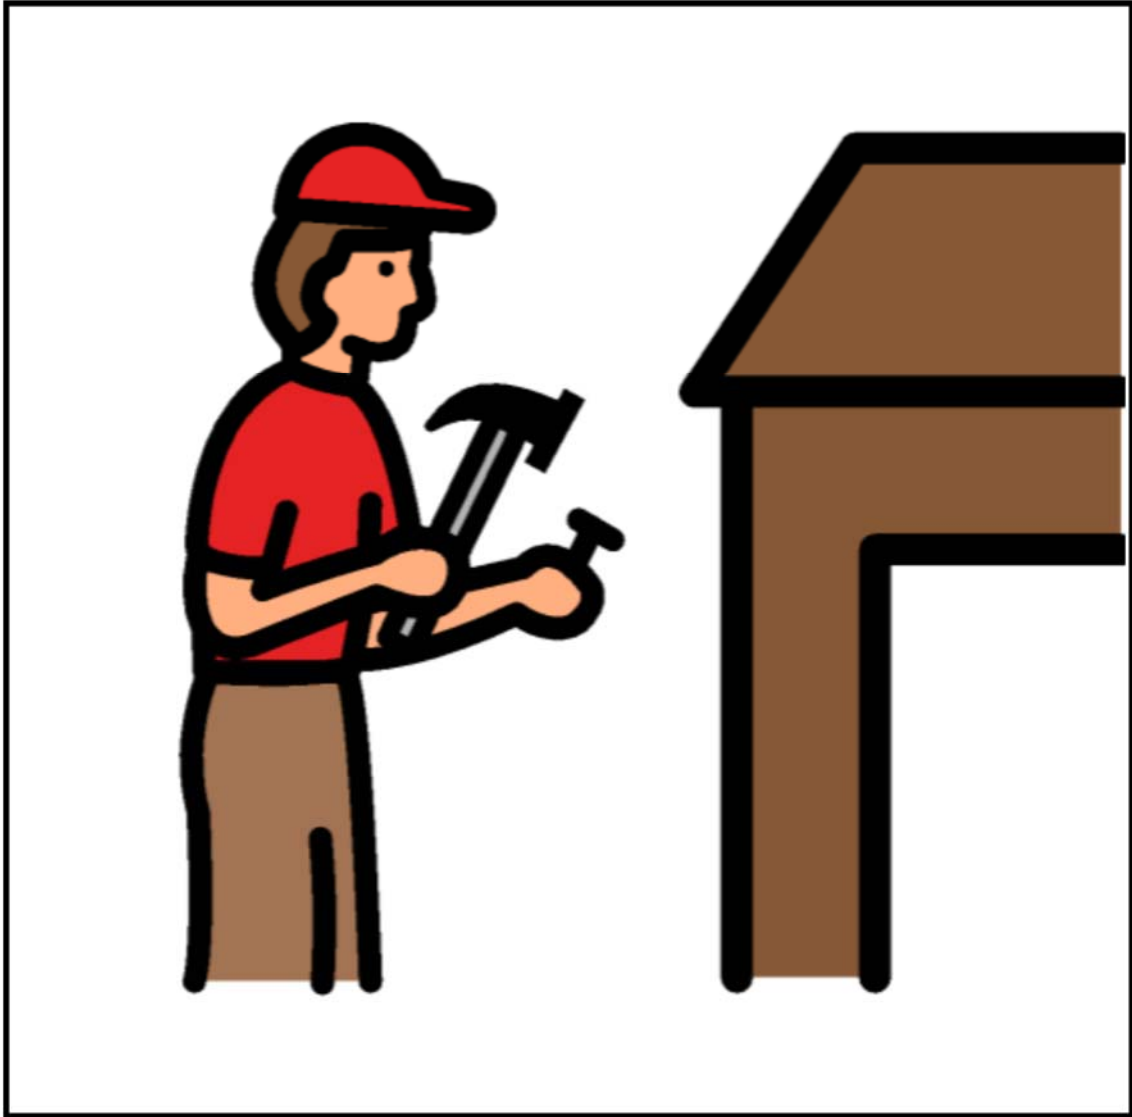

Sometimes we will not have any electricity or water for a while. This means we will have no TV or computers. We can do other things to keep busy like read a book or draw a picture.

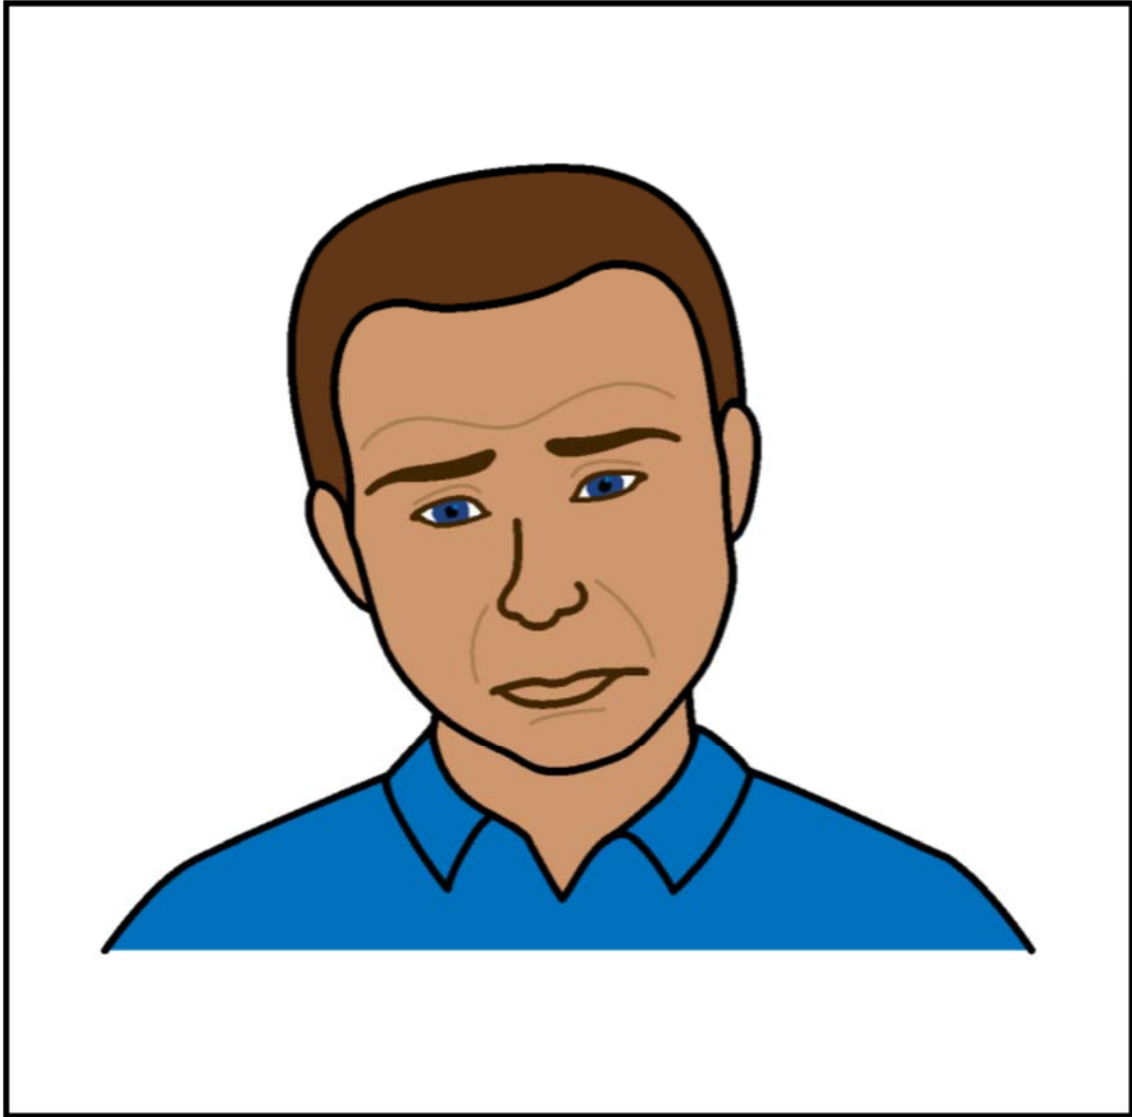

Sometimes our phones will not work. We should stay with our family so that everyone knows we are safe.

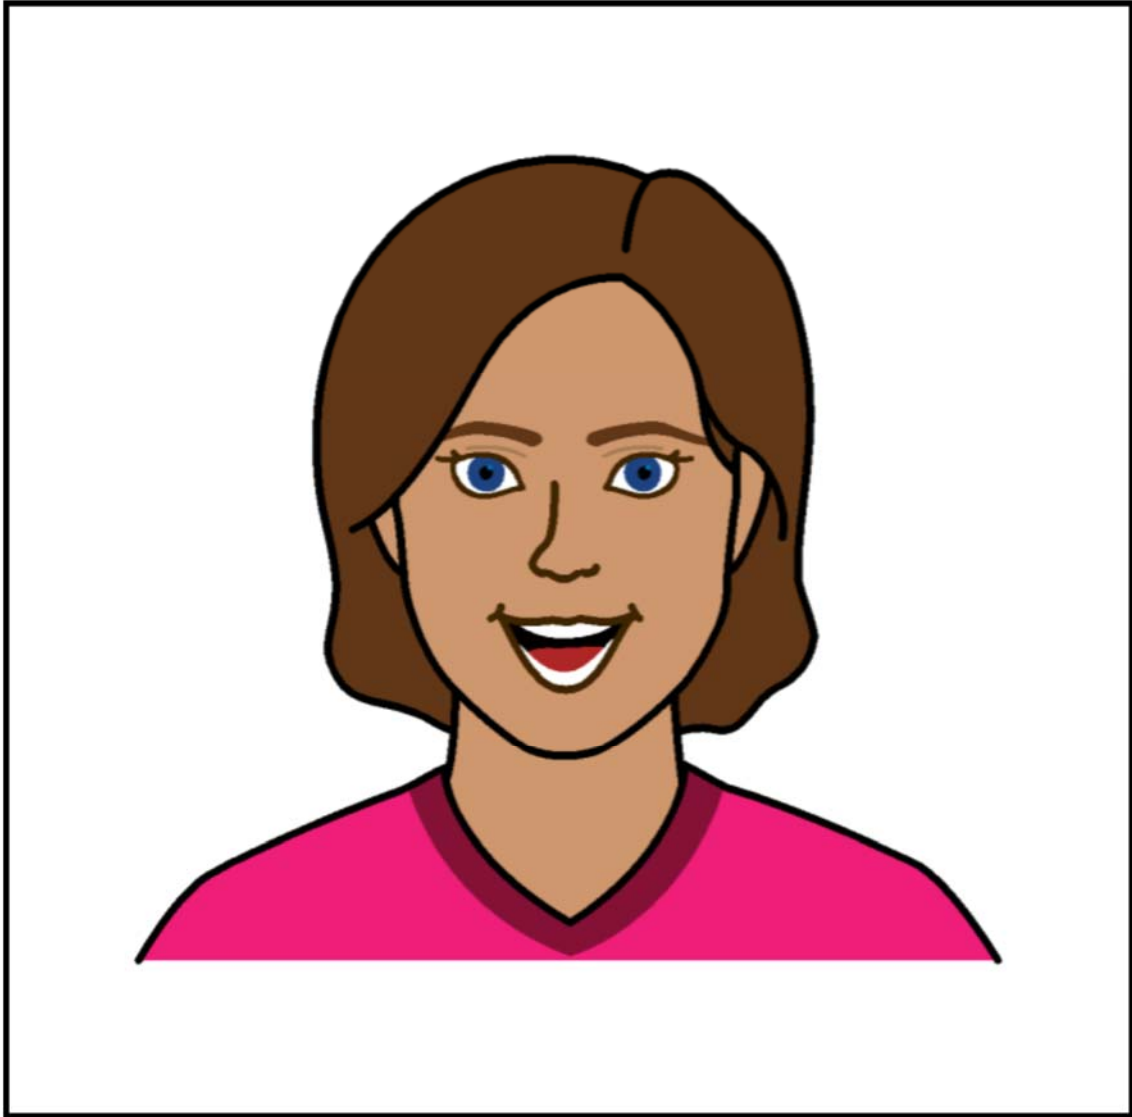

*We might not be able to go back to our homes
until all of the damage is fixed and the mess
is cleaned up.*

*After a natural disaster, people can feel sad.
They might feel sad because they have
damage to their house or a big mess to
clean up.*

*After the natural disaster has finished, people
will feel happy again.*
